

Group Task1: Intro to Figma

Why UI design is important

User interface (UI) design is the process of designing user interfaces for software or other digital products. The goal of UI design is to create interfaces that are easy to use and understand, and that help users achieve their goals.

UI design is important because it can have a significant impact on the user experience. A well-designed UI can make a product more enjoyable to use, while a poorly designed UI can make it frustrating and difficult to use.

Figma

Figma is a designing and prototyping tool for creating user interfaces. It is a cloud-based application, which means that you can access it from anywhere with an internet connection.

Figma is a popular tool for UI design because it is easy to use and has a wide range of features. It also supports collaboration, which makes it easy to work on projects with other designers.

If you are a beginner we recommend you to watch the “Intro to Figma” and other relevant videos from the bookmark section in the campus.

After watching the videos you are required to do the following task which can help you in familiarising the Figma tool and helpful for you in your future learnings.

Your task is to replicate the following image.

The image shown is just for a reference.

You are allowed to come up with your creativity and change the content, colors or overall structure.

If you are new to using Figma and finding problems to re-create this, try to revisit the provided reference videos on shapes, colors, text, importing images in figma.

Explore different kind of frames in Figma and use suitable one for the given reference image.

Deadline

Two days from the start of your assignment.

Ex: If you start on Dec 1st submit your assignment on Dec 3rd.

Submission Guidelines

Please make sure that you have given Anyone with the link - **can view** access, so that mentors can evaluate your submissions.
